return ticket to chennai. Surya refused to go back and decided to work in Mumbai and started cleaning utensils in a restaurant.

A customer made him an offer, he was planning to open a tea shop in Vashi in Mumbai. He wanted Surya to be his 50-50 partner where the owner would invest the money while Surya would run the shop. Surya agreed and joined the business. The shop started and in a years time it started doing brisk business. After few years of experience, Surya then started a South Indian stall of his own. He did not know a thing about dosas and idli but learnt by observation, trial and error. The dosas was a huge hit and flourished during 5 years.

Questions:

1. With reference to the above case identify the challenges faced by Surya. 8
2. Develop a detailed business plan to help Surya expand his business. 7

RP-Con. 2700-16.

Morning

QP Code : 26311

(2½ Hours)

[Total Marks : 75

- N. B. : (1) All questions are compulsory subject to Internal choice.
(2) Figures to right indicate full marks.
(3) Use of simple calculator is allowed.

1. Attempt any two question

15

- (a) What do you mean by Disequilibrium in Balance of Payment? What are the measures taken to control it?
- (b) The following quote is given in Sydney:
AUD / CHF = 0.5395- 0.5425.
100 JPY = AUD 1.1822/1.1856
(i) State if the above quotes are direct or indirect?
(ii) Find the inverse for both the quotes
(iii) Find the mid-rate, Spread and Spread% for AUD/CHF
(iv) Find the mid-rate, Spread and Spread% for 100 JPY/AUD
- (c) The Bank of New York quotes USD/SGD = 1.3785/1.3795. Simultaneously SBI in Mumbai quotes USD/INR at 67.5428/67.5448. If the bank in Singapore quotes SGD/INR = 49.0050/49.0060. Calculate possible arbitrage gain for a trade of 1 million.

2. Attempt any two question

15

- (a) Given: Spot USD/INR = 66.1950, 3-month forward Rate 66.2450. USD Interest Rate: 2.60% p.a. INR Interest Rate: 3.50% p.a. Calculate Covered Interest Rate Arbitrage assuming 1 million currency Unit.
- (b) From the following quotes decide the best alternative for investing INR 2 million for 4 months on a risk free basis.

	Spot	4 month Forward	Interest rate (P.A.)
INR			4.00% - 4.25%
USD	65.70/65.80	66.10/66.30	2.25% 2.75%
CHF	68.90/69.00	69.30/69.40	1.25%- 1.75%
GBP	90.10/90.25	91.00/91.15	3.25%-3.75%

- (c) Discuss briefly the Bretton wood system. What were the reasons for the failure of Bretton wood system?

[TURN OVER

RP-Con. 5139-16.

3. Attempt any two questions 15
- (a) Explain briefly the functions of Foreign Exchange market? Discuss the participants in Foreign Exchange market.
 - (b) Write short notes on:
 - i) Petro Dollars ii) Euro credit iii) Tax Haven

5. (a) Following quote are available in Mumbai; USD/INR: 57.7012/57.7216 (spot rate). 3 month forward points are 300/380. 15
- (i) Calculate Outright forward Rate for 62 days and 3month.
 - (ii) Calculate Annualised forward margin for the 3 month forward rate.

Case Study: Chinese Currency and Stock market

Shanghai: China stock markets closed for the day less than half an hour after opening Thursday when shares fell more than seven per cent, triggering an automatic "circuit breaker", after authorities intervened to lower the Yuan's value by the most since August. The falls came amid worries over slowing growth in the world's second-largest economy and biggest trader in goods, which have roiled investors worldwide, and with pressure on its currency from capital outflows.

Later the authorities devalued the Yuan's central rate against the US dollar by 0.51 per cent to 6.5646, the lowest since March 2011. It was the biggest drop since August Bloomberg News reported, when Beijing guided the unit down by nearly five per cent in a week in a surprise devaluation. China limits the Yuan to rising or falling two percent on either side of the reference rate, set by the central People's Bank of China (PBoC).
